A smart and easy to use tool that allows you to easily extract iPhone backup files, including contacts, notes, audio and video files, from iTunes or iCloud Backup Let's be serious! Have you ever installed a software, then found that it doesn't work? And you don't know the reason or the fix? If you haven't, you are lucky! I definitely faced many that have made me feel that way. But not anymore. Since I started using this tool, I was absolutely surprised how so many tools won't work without any error messages. Now let's figure out how to solve this. This Tutorial will guide you on some of the most common issues you may face and their easy solutions. 1-Youtube videos are not compatible with some software. All that is necessary for you to know is that if you are not able to install the software because of it, here is how to restore Youtube videos back to your computer: Install these two softwares: YUVI YUVI to Mux YUVI to QuickTime 2-The software may not open after downloading. From one year, a week ago, I'm known many users who have faced this issue and many of them say that they had to uninstall and re-install the software a number of times. However, in this step, I'll tell you how to make it work with ease, in just a few clicks. Download the software you want to install. Copy and paste the download link to a new Notepad or another software you use frequently. Open the downloaded file and hit "Open". Just next to the download button, you'll see a number of options. Leave the default one if it's gray, but change the "Name" to what the software you downloaded is called. Then press "OK". The software will open after you press "Open". Just follow the steps from now on. 3-When installing the software, the original "Installer" and "Setup" icons are missing. And the installation is completed. 4-There is no audio/video stream after installing The funny thing is that I never

AutoSync Me is a simple and handy iPhone Manager that helps users export mobile device backup files as portable documents, so that they can be opened as an Excel spreadsheet or Word document. Quick and easy setup The program comes bundled with a set of macro commands that allows anyone to start working with it in just a few mouse clicks. This means that both computer or iPhone users do not need to be familiar with Windows or iPhone menus to get this task done. Examine mobile backup files and export as Excel documents and Word docs The interface is not complex, and it comes in a drag-and-drop interface, which makes any user familiar with the Windows environment feel comfortable. The app successfully analyzes the backup files and shows the icons of mobile contacts, notes, photos, documents, messages, call logs and videos, along with the device name, IMEI, date and status. To get the files as Excel documents or Word docs, simply choose the file type and press the Export button. Evaluation and conclusion In our tests, AutoSync Me was able to extract the backup files quickly from an iPhone without freezing, crashing or displaying any error messages. This program is not the most resourceful file extraction tool, but it is the most easy to use, which clearly makes it a winner. AutoSync Me Description: iPhone Duplicate Manager helps users duplicate the files, folders, contacts, voice memos, notes, texts, calendar events, call history, images and videos from an iPhone backup as a text file and a copy of the device. Intuitive and easy setup The program comes with a very simple setup that does not require any additional information. After choosing the folder where all backup files are stored, it is possible to get started by running the Duplicate iPhone Files macro. In addition, the program allows users to combine individual files into a single text file and save it on the local hard drive. This can be done manually, or the user can select the output file format from the drop-down list and click the Export button. The software is easy to use, but advanced users do need to manually set the file type before exporting. In addition, they also need to decide which elements to include in the backup file. Evaluation and conclusion The program does not require additional setup time. The built-in instructions are easy to follow and there are no commands to learn. As a result, users can use this easy-to-use program without any

It may happen that you replace your iPhone and you want to put your old iPhone back on, but there is a possibility that you don't have a backup or it is so old that you don't remember it, but you do not want to take the risk of damaging your new iPhone. The iPhone Recovery utility by Mobilize allows you to recover old iPhone backups from Apple computers, Macs or PC using iTunes backup files, thus saving you from possible data loss. iPhone Recovery allows you to recover deleted contacts, photos, videos, call history, calendar events, SMS messages and more with just a couple of clicks, and it does not require advanced skills or previous experience. The app works on all versions of iOS from 3.0 up to the current iOS 11.2 and it even works on Android phones, iPads, iPod touch and watches. Just launch the iOS backup extractor and specify the full path of the backup file, then you are done. If the iPhone backup file that you want to extract is too large, the tool automatically creates several smaller versions. Pros: • Supports all iOS devices from iPhone 3G up to the latest iPhones. • Generates multiple backups for each backup file. • It works on both Macs and PCs and on Android devices. • No prior computer knowledge is required to use it. • Restores your iPhone data or iPod touch, iPad or iPod nano. • It works on all iOS devices. • It works on all iOS versions. • The best iPhone data backup extractor available. • Over 130,000+ users rated the app a 4.5+ star average

rating out of 5. • It's freeware! No hidden fees. • It worked well on our tests with quite an old iPhone 3G backup
